

Yuriy Tkachuk

iOS Engineer · 4 years · Swift / SwiftUI / UIKit · Kyiv, remote

y.tkachuk@example.com · github.com/ytkachuk · linkedin.com/in/ytkachuk

Summary

iOS-розробник з 4-річним досвідом, спеціалізація — consumer subscription apps на Swift. Останні 2 роки — single iOS dev у B2C продукті (~120k MAU, 4.7★ App Store). Strong у MVVM-Coordinator, asynchronous Swift Concurrency, performance optimization, in-app purchase + StoreKit 2.

Experience

iOS Engineer — Reface (AI photo/video, B2C)

Apr 2024 — Present · Kyiv (remote) · PRODUCTION

- Sole iOS dev для consumer subscription app — Swift 5.9, SwiftUI + UIKit interop, MVVM-C, Combine + Swift Concurrency (async/await, actors).
- Migrated 80% of legacy UIKit screens на SwiftUI; crash-free sessions піднялись з 99.2% до 99.7% за 6 місяців (Crashlytics).
- StoreKit 2 integration для subscriptions — promotional offers, restore-purchase flow, server-side receipt validation. Subscription conversion rate +9% (A/B test, n=120k).
- CI/CD: Bitrise + Fastlane lane для TestFlight + App Store releases. Release cadence — 1 раз/2 тижні.

iOS Engineer (junior → mid) — SoftServe (outsource, client: UK fintech)

Aug 2022 — Mar 2024 · Lviv (hybrid) · PRODUCTION

- Banking app для UK retail bank — Swift, UIKit, MVVM, Core Data, KeychainAccess, Snapshot tests via FBSnapshotTestCase.
- Built biometric auth (Face ID/Touch ID) + secure pinpad component for sensitive flows.
- Pair-programming sessions з platform team — code reviews twice weekly.

Junior iOS Developer — Sigma Software

Jun 2021 — Jul 2022 · Lviv · PRODUCTION

- First commercial role — Swift 5, UIKit, Cocoapods, Alamofire. B2C marketplace app (German client).

iOS Intern — EPAM

Feb 2021 — May 2021 · Lviv · INTERNSHIP

- 4-month bootcamp + mini-projects on iOS fundamentals.

Skills

Languages: Swift (advanced, daily 4 years), Objective-C (basic, legacy maintenance), Bash.

UI: SwiftUI (advanced — daily 1.5 years), UIKit (advanced, Auto Layout, custom transitions, animations), Combine, Swift Concurrency.

Architecture: MVVM, MVVM-Coordinator, VIPER (legacy projects), Clean Architecture principles, dependency injection (Resolver, Swinject).

Frameworks: Core Data, Core Animation, CoreGraphics, AVFoundation (limited), MapKit, CallKit (one feature), HealthKit (briefly).

StoreKit 2 + monetization: subscription management, promotional offers, App Store Connect API, server receipt validation.

Tooling: Xcode 15, Swift Package Manager, CocoaPods (legacy), Fastlane, Bitrise (CI), GitHub Actions, SwiftLint, SwiftFormat.

Testing: XCTest, XCUITest (UI), FBSnapshotTestCase, Quick + Nimble (BDD style), TDD when starting new features.

Other tools: Git, Jira, Figma (dev mode), Charles Proxy, Reveal, Firebase (Crashlytics, Analytics, Remote Config), Sentry, Amplitude.

Education

NTUU Kyiv Polytechnic Institute (KPI)

Bachelor's in Computer Engineering · 2017-2021 · Completed

Online courses: Stanford CS193p — Developing Applications for iOS (audited 2022); Paul Hudson Hacking with Swift+ subscriber (2023+); raywenderlich.com book — Combine: Asynchronous Programming.

Languages

- Ukrainian — native
- English — B2 (daily code reviews + design conversations)

Target Roles

Mid/Senior iOS Engineer · iOS Developer (Swift/SwiftUI) · Mobile Engineer (iOS-first). Цікавлять product B2C apps. Не зацікавлений у Objective-C-only legacy maintenance roles.
