

Anastasiya Kovalchuk

Senior Android Engineer · 7 years · Kotlin / Jetpack Compose / KMP · Kyiv

a.kovalchuk@example.com · github.com/akovalchuk · linkedin.com/in/akovalchuk

Summary

Android-розробниця з 7 років production досвіду. Спеціалізація: modern Android stack (Kotlin, Jetpack Compose, Coroutines + Flow, Hilt). Shipped 3 production apps з 10M+ downloads загалом. Останній рік — tech lead для Android team з 4 розробників. Active KMP (Kotlin Multiplatform) practitioner — shared business logic з iOS на 2 features.

Experience

Senior Android Engineer / Tech Lead — MacPaw (CleanMyMac maker, Setapp)

Jan 2023 — Present · Kyiv (remote-hybrid) · PRODUCTION

- Tech lead Android team (4 engineers) на Setapp mobile companion app — sprint planning, code review ownership, hiring loop (interviewed 18, hired 2).
- Migrated entire app з XML+ViewModel до 100% Jetpack Compose протягом 9 місяців — incremental feature-by-feature, no big-bang rewrite.
- KMP pilot: shared subscription validation + analytics модулі з iOS team — 4500 LOC shared, 30% reduction у platform-divergence bugs.
- Performance audit + fix: cold start 2.4s → 1.2s через App Startup library + lazy module loading + R8 optimization.

Senior Android Engineer — Grammarly

Aug 2020 — Dec 2022 · Kyiv · PRODUCTION

- Worked on Grammarly Keyboard for Android — Kotlin, custom IME (input method editor) framework, on-device ML inference (TFLite).
- Migrated REST API client з RxJava до Coroutines + Flow — eliminated entire category of subscription leaks (Crashlytics non-fatal events ↓ 60%).
- Set up Modularization (29 Gradle modules) — clean architecture layers, faster incremental builds (35% reduction).

Android Engineer (mid → senior) — Genesis (Universe Group apps)

Sep 2018 — Jul 2020 · Kyiv · PRODUCTION

- B2C subscription apps — Kotlin, RxJava, Dagger 2, Room. 2 апки shipped до production.

Junior Android Developer — Ciklum

May 2017 — Aug 2018 · Kyiv · PRODUCTION

- First role — Java + Kotlin mix, MVP architecture, Retrofit, ButterKnife. Banking client (Norwegian).

Android Intern — EPAM

Feb 2017 — Apr 2017 · Kyiv · INTERNSHIP

- 3-month bootcamp — Android fundamentals + Java basics.

Skills

Languages: Kotlin (advanced, daily 7 years), Java (intermediate, legacy maintenance), Bash, KDoc.

UI: Jetpack Compose (advanced — daily 2.5 years), XML Views (5+ years, deep), Material You (M3) theming, custom Canvas drawing, animations (Compose + classic transitions).

Async: Coroutines (advanced, daily 4 years), Flow (StateFlow/SharedFlow patterns), structured concurrency, RxJava 2/3 (legacy maintenance).

Architecture: MVVM, MVI (preferred for new code), Clean Architecture, modularization (feature/data/domain split), Hilt (current), Dagger 2 (legacy), Koin (some side projects).

Jetpack: Navigation, Room, DataStore, WorkManager, Paging 3, ViewModel, Lifecycle, CameraX. Compose Navigation, Compose Lifecycle.

KMP: shipped 2 shared modules in production (Ktor, kotlinx.serialization, kotlinx.coroutines, SQLDelight).

Build / Tooling: Gradle (Kotlin DSL, version catalogs, convention plugins), R8/ProGuard, build flavors, Gradle Managed Devices, KSP.

CI/CD: GitHub Actions, Bitrise, Fastlane, Firebase App Distribution, Play Console Internal Testing.

Testing: JUnit, MockK, Turbine (Flow testing), Compose UI tests, Espresso (legacy), Roborazzi screenshot tests, Maestro (E2E flows).

Tools: Android Studio, Charles Proxy, LeakCanary, Android Profiler, perfetto traces, Firebase Crashlytics + Performance + Remote Config, Sentry, Amplitude.

Education

NTUU Kyiv Polytechnic Institute (KPI)

Master's in Computer Science · 2015-2017 · Completed

NTUU Kyiv Polytechnic Institute (KPI)

Bachelor's in Computer Science · 2011-2015 · Completed

Talks / community: speaker at Kyiv Android User Group meetup 2024 ("Compose performance pitfalls"); regular reviewer on Android Weekly newsletter (volunteer 2023+).

Languages

- Ukrainian — native
- English — C1 (conference talks, written design docs)

Target Roles

Senior / Staff Android Engineer · Android Tech Lead · Mobile Platform Engineer (KMP) · Engineering Manager (Android track, longer term). Цікавлять product B2C/B2B apps; не зацікавлена у pure Java legacy ролях.
