

Dmytro Hrushevsky

Senior Engineering Manager · 10 years total (4 EM + 6 IC) · Kyiv

d.hrushevsky@example.com · linkedin.com/in/dhrushevsky

Summary

Engineering Manager з 4-річним досвідом people management + 6 років як IC backend engineer. Lead-ив команди 5-12 інженерів у B2B SaaS та B2C продуктах. Strong focus: hiring pipeline, performance management, technical strategy alongside Product/Design partners, incident response, on-call culture. Backend background — досі читаю code reviews, не пишу production code last 2 роки.

Experience

Senior Engineering Manager — Preply (EdTech, B2C marketplace)

Mar 2024 — Present · Kyiv (remote) · PRODUCTION

- Manage 2 backend teams (12 engineers total) — Payments + Marketplace Search. Direct reports: 2 tech leads + 1 senior engineer.
- Hiring: closed 4 senior backend hires + 1 staff engineer за 11 місяців. Built phone-screen + system-design loop with 70% senior offer-acceptance rate.
- Drove company-wide migration з Python 2.7 monolith → Python 3.11 + service-oriented architecture (Q1-Q3 2024). 6 services extracted, zero customer-facing incidents.
- Set up engineering quarterly OKRs alongside CTO; chair monthly tech-strategy meeting.

Engineering Manager — Genesis (Universe Group)

Jun 2022 — Feb 2024 · Kyiv · PRODUCTION

- Manage backend team (7 engineers) для one consumer subscription app, ~3M MAU. Inherited team з 2 misses on annual OKRs — rebuilt sprint review + planning rituals, hit 5/5 OKRs next year.
- Coached 3 mid engineers до senior level (formal promotion process — calibration with skip-level + HR).
- Owned on-call rotation policy + SLO targets — p95 API latency target 200ms, achieved 184ms over rolling 90 days.

Tech Lead — SoftServe

Aug 2020 — May 2022 · Lviv · PRODUCTION

- Tech lead, 5-engineer team на US healthcare client. Mix of architecture decisions + 30-40% IC time.
- Architected microservices split з Python monolith для 1 client; project delivered on schedule.

Senior Backend Engineer — EPAM

Jul 2018 — Jul 2020 · Lviv · PRODUCTION

- Python + Django Rest Framework + PostgreSQL + AWS. Client projects in fintech + e-commerce.

Mid → Senior Backend Engineer — Ciklum

Aug 2015 — Jun 2018 · Kyiv · PRODUCTION

- Multi-client work in Django + Flask. Promoted to Senior in 2017.

Junior Backend Developer — SoftServe

Jul 2014 — Jul 2015 · Lviv · PRODUCTION

- First commercial role — Django ORM, PostgreSQL, REST APIs.

Skills

People management: 1:1s, performance reviews, calibration cycles, promotion cases, PIP cases (handled 2), hiring pipelines (phone screen + system design + culture loops), interview scorecards, hiring committee chairing.

Organizational: OKR planning, capacity planning, roadmap negotiation with Product, cross-functional alignment, incident postmortems (blameless), engineering culture documents, on-call policy design.

Strategy + architecture (advisory now): service-oriented architecture, monolith→microservices migration patterns, API contract design, technical risk assessment, build-vs-buy analysis.

Engineering background (read-only now): Python, Django, FastAPI, PostgreSQL, Redis, Kafka, AWS (EC2, RDS, Lambda, S3), Kubernetes (basic).

Tools (daily): Notion, Linear (was Jira earlier), Slack, Loom, Figma (read-only for product reviews), Lattice (performance reviews), Greenhouse (hiring), Pager Duty.

Frameworks (managerial): Stripe-style "manager-as-multiplier", Camille Fournier playbook, Ben Horowitz on hard things, Andy Grove HOM.

Education

NTUU Kyiv Polytechnic Institute (KPI)

Master's in Software Engineering · 2012–2014 · Completed

NTUU Kyiv Polytechnic Institute (KPI)

Bachelor's in Software Engineering · 2008–2012 · Completed

Continuing education: "Become an Effective Software Engineering Manager" (James Stanier book — book club at Preply 2024); LeadDev Conference (London, 2023, attended).

Languages

- Ukrainian — native
- English — C1 (daily — written engineering docs, executive presentations)

Target Roles

Senior Engineering Manager · Director of Engineering · Director of Platform · Head of Backend.
Цікавлять product B2C / B2B SaaS на scale 50-200+ engineers. Не зацікавлений у IC senior engineer ролях (готовий повернутись lower у дуже виключних випадках).
